- 4.22

summary of...

Usability test results

tasks:

- 1- Create a new account.
- 2- Add a goal to sleep for 8 hours a day for a week. **(1 non-critical)**
- 3-Add a new profile in the Meals section, then delete it.**(1 critical)**
- 4-Check your private messages in the Steps Section and react to the sent message, then share your results for today.**(1 critical)**
- 5-Change your privacy settings.**(2 non-critical)**

Tasks	Number of errors	Errors description	Critical or non-critical (C,NC)
Task 1	0		
Task 2	1	the user got confused if they need to click the sleep button or the goals in the home	non-critical
Task 3	1	The user didn't click save after filling account information, so the app didn't save the account	critical
Task 4	1	The user didn't know how to react to the message	critical
Task 5	2	Both users got lost in settings	non-critical

Findings

01

Unnecessary empty spaces in main menu.

02

Memory of the device should be considered and options for clearing cache for direct messages might be needed.

03

There are no options for people with special needs like diabetics and high blood pressure patients.

FUTURE RECOMMENDATIONS

01 Meals History

To allows the users to see their recent meals history.

02 Dark mode

To make users more comfortable using the app in the dark.

CONCLUSION

With Tracky, you can effortlessly track different aspects of your daily activities, from counting steps and monitoring sleep hours to suggesting nutritious meals tailored to your fitness objectives. Say goodbye to the days of juggling multiple apps to manage different aspects of your wellness journey.

Tracky consolidates everything you need in one intuitive platform.

Thank You !
